

WASTEWATER DIVERSION SYSTEMS, INC.

WDS ON DEMAND

Over 45 years Experience | 100% American-Owned and Operated

WDS SILT, SOLIDS, HYDROCARBON CONTAINMENT CHAMBER

Ideal for use in any outdoor spaces where pollution from runoff during rainstorms is a concern.

The system captures all forms of litter, including cigarette butts and sizable objects, preventing their entry into the stormwater system.

IAPMO IGC 234 2016
File Number 16834

Model WDS-SSHCC

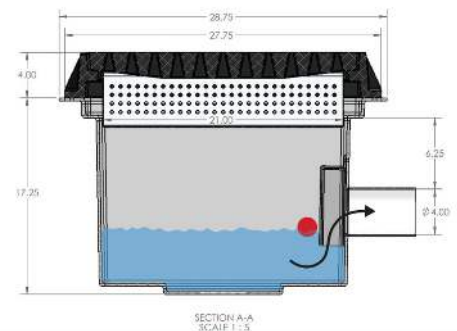

Automatically send clean water to the storm drain and retain free-floating hydrocarbons

The WDS Silt, Solids, and Hydrocarbon Containment Chamber employs a baffled stormwater discharge system that seamlessly directs clean water into the storm drain while collecting debris and all non-bound hydrocarbons within the containment unit.

* Oil absorbent sock also included.

Specs and drawings available at eeeusa.net

Oil Absorbing Sock:
Absorbs and retains oils and oil-based liquids, including lubricants and fuels, without absorbing water.

Made in AMERICA
